Instructions

Electrified Hardware Back-Box Assembly for Wired Door Hardware

Specifically designed for an easy, professional solution to all electronic access control systems. Replaces the door frame metal mortar box where wired hardware is installed, providing a smooth, seamless pathway while future-proofing door hardware wiring access.

Features

1. Suitable for electronic locks, strikes, card readers, position switches, or any other devices for wired access control systems.
2. Compatible with hollow metal masonry and drywall type door frames.
3. Four connection points for universal wiring configurations.
4. Limited for Class 2 Single Source power supplies only with system wiring voltage of 30 volts or less.
5. Fits Standard Profile Hollow Metal Frames from 5 3/4" to 9 1/4" in depth.
6. Removable port caps left in place protect the back box from mortar intrusion.
7. Optional adjustable Wing Tabs for shop or field installation. (Sold separately).

**Fire Rated for Door
Frames up to 3 Hours.**

Benefits

1. Patented design seamlessly directs a fish tape directly into the connected conduit.
2. Divider walls guide a fish tape to your chosen conduit path with the flick of a finger.
3. Wiring pathways are easily accessible through entry point even after construction is complete.
4. Easily fish additional wiring for last minute changes or repairs.
5. Future-proof doors for any potential needed security or data needs.
